WOMEN'S INNERWEAR - JFH

[TABLE OF CONTENTS](#)

FABRICS USED IN JOCKEY PRODUCTS

Super Combed Cotton : The process of combing the cotton fabric gets rid of shorter fibres and impurities making it compact, finer and stronger. Combing once makes it 'Combed Cotton' and twice makes it 'Super Combed Cotton'

Cotton Elastane Stretch / Cotton Lycra Stretch : Elastane is a synthetic fibre with exceptional elasticity (stretch). Blending this fibre with cotton makes the fabric stretch and revert to its original form (very similar to a rubber band). This provides the product with grip to hold on to the body while remaining extremely comfortable. Lycra is a brand of Elastane Stretch fabric.

COTTON RICH : Is a fabric which is a blend of primarily cotton and a small component of elastane or polyester. The secondary component provides stability to the garment making it durable.

MICROFIBER : Microfiber is made from synthetic materials, typically a polyester or nylon blend. It is very fine - about one-third the diameter of a cotton fiber. It is highly absorbent and lint-free. It also has a longer lifespan when properly used and maintained.

Mesh : Mesh is a fabric with open spaces between the yarns. It is used in sportswear as it provides comfort, stretch and allows air to circulate.

Mercerized Cotton : Mercerization is a process of treating cotton fabric with alkali chemical. This increases the lusture and softness, gives greater strength, and improves the fabric's colour.

FABRICS USED IN JOCKEY PRODUCTS

Pima Cotton / Supima Cotton : Pima cotton is a premium variant of cotton. When compared to cotton, Pima cotton is much softer on the skin. It is also more absorbent than regular cotton and helps in wicking moisture / sweat. It is also a very durable fabric. Supima is a brand of pima cotton fabric.

Modal / Micro Modal : Modal is a premium cellulosic fibre made out of beech tree. Modal fibre is strong, resilient, and has minimal shrinkage. It keeps colour bright and has silky hand feel. Micro Modal is finer form of Modal.

Tencel : Lyocell is a premium, eco-friendly fabric developed from wood pulp. The fabric is lightweight, moisture absorbent, silky feel and has a natural anti-bacterial properties. Tencel is brand name of Lyocell.

Tactel : is a specialty premium fibre with a very soft feel and brilliant appearance. It is stronger / tougher than most fabrics and has natural properties of breathability and quick dry.

Plated Cotton : Used in the SP Range in Jockey, plated cotton fabric has a very soft hand feel and helps in Moisture Control making it best suited for Performance / Fitness wear.

Chambray Cotton : Chambray is a woven fabric that uses a combination of white and colour yarn to give the product a premium look

French Terry : French Terry is a fabric which is flat on one side and has loops (Similar to Terry Towel) on the inner side. The fabric helps absorb moisture / sweat but is lightweight when compared to Towel Terry. It is best suited for lightweight Jackets, Sweatshirts and Tracks for Indian weather.

TYPES OF UNDERWEAR

Bikini:

This panty with narrow side-seam and adequate back coverage can be fearlessly worn under anything.

Hipster:

Famous as hip-huggers, these panties are of mid-coverage but higher side-seam coverage than bikini.

Full Brief:

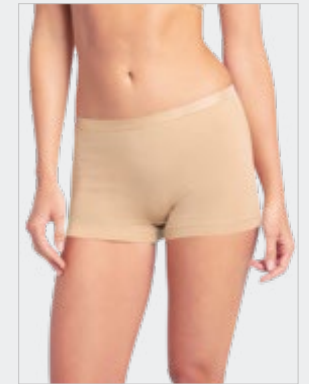

This panty sits on navel waist line, gives full coverage at the back.

TYPES OF UNDERWEAR

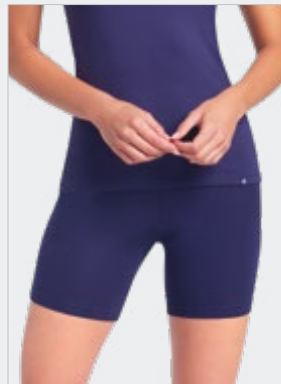

Boy Leg:

These resemble shorts but have a lower-cut leg covering most of the upper thigh.

Boy Shorts:

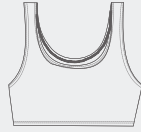

This resembles as shorts that cover the upper thigh more than Boy leg.

Shorties:

This resembles as shorts that covers the lower thighs.
